Linkedin skills assessment

What is linkedin skills assessment

The LinkedIn Skill Assessments feature allows you to demonstrate your knowledge of the skills you've added on your profile by completing assessments specific to those skills.

A typical assessment consists of 15 multiple choice questions and each question tests at least one concept or subskill.

The questions are timed and must be completed in one session.

Motivation for linkedin skills assessment

It's not mandatory for you to take the assessment. However, **taking the assessment will help you stand out by showcasing that you have the desired skills of an ideal candidate, as well as increase your chances of getting noticed by other recruiters**.

Recruiters won't be able to see your score. If you pass the assessment, recruiters will see the badge on your profile, if you choose to display it.

Creation of skills assessment

LinkedIn Skill Assessments are produced by subject matter experts and leaders in the LinkedIn Learning community, who have extensive experience in generating exam and certification content.

To improve the quality and relevancy of assessments:

- Multiple writers, instructors, and authors write the questions.
- Peer reviewers regularly provide feedback to improve the content.
- Each question is timed, which makes it difficult to look up answers while taking the skill assessment.
- A computer-based methodology called adaptive testing is used to recognize your skill level and then adjust the questions you're asked accordingly. (???)
